

CA141

Spring 2008 - January 26th

Homework #1

Directions:

- ✘ Write your answers to the following questions in a Word document (either Word 2003 or Word 2007).
- ✘ Submit your homework file via the class website, www.danamathews.com click on "Submit Homework" button.
- ✘ Due by 6:00 PM on January 29th
- ✘ Bring a printed copy of your answers to the next class.

1. In your own words, define the following:
 1. data
 2. field
 3. record

2. List the four database objects we will be using and using your own words, briefly describe the purpose of each.

3. We will be creating a Montgomery College Student table; this table will contain student contact information. List at least eight field names that would be used in this table.

4. We need a Montgomery College Course table, it will to contain courses offered at the college and their descriptive information. List at least six field names you that will be used in this table.
